## Technology Tip of the Week \_\_\_\_\_

At the General Meeting last week, Tom Shepherd mentioned several browser options and discussed search engines. One of these was DuckDuckGo. They DO NOT track your activity, and block others (Google) from tracking you.

"The DuckDuckGo Privacy Browser mobile app and Privacy Essentials desktop extension both come with

our best-in-class tracker blocker, encryption enforcer, and private search engine – all in one simple package. This gives you all the key privacy protection tools to search and browse privately, curbing the constant monitoring of your Internet activity by companies like Google and Facebook."
