**\*Hope you're Summer is Heating up with FUN!\***

Occasionally there is some technical news that affects our Members and we want to share this with you. The latest is related to the Zona Wyyerd introduction to our community.

**\*Dan Wallen, Tech Help Director, shared the following info:\***

" If you are leaving Cox internet for Zona Wyyerd or the wireless providers like T-Mobile and Verizon, you **\*WILL\*** lose your Cox emails and contacts after 90 days. If you want to keep your Cox contacts or Cox emails, you must export them from Cox to your new email system.

We can help you with this process at tech help on Tuesdays.

Additionally, if you have a contract with Cox, you may be liable for extra charges for early termination of your Cox contract."

Additional Information from contact with Zona Wyyerd re: pricing etc.

I heard from a "Neighborhood Manager" for Zona Wyyerd, asking if we were ready to sign on.

The options quoted:

300 mbps - \$65

600 mbps - \$80

1 GIG - \$95

2 GIG - \$150

This includes (their words...):

- \* no annual price hikes
- \* free installation
- \* new router (no rental fee)
- \* no hidden fees (tax)
- \* same upload and download speed
- \* no data caps
- \* local customer support
- \* no contract

I inquired about the summer when we are not in Arizona. They charge \$20 per month for "Vacation mode" with about 15 mbps download speed. According to them, this is plenty to manage your smart home cameras, thermostat etc. (Don't know how many "smart" devices this would handle - we'll ask tech help!)
