# Find My – One App To Find It All

# Find My App

The Find My app makes it easy to keep track of your Apple devices — even if they're offline. You can also locate items using AirTag or Find My technology. Plus, you can keep up with friends and family. And your privacy is protected every step

You take your devices everywhere. Which means you might leave them anywhere. Get help finding them in the Find My app or new Find My widget, which lets you track your devices at a glance, right on the Home Screen of your iPhone or iPad.

# See All Your Devices On A Map.

Is your iPad at home or back at the office? Use the map to get a full picture of where your devices are — and where a missing one might be. For more info, just tap on a product icon. Some devices can still send their location for up to 24 hours after they've been turned off or have low battery life.

# Play A Sound To Your Device

When you can't find something but think it's nearby or around others who might hear it, you can play a sound to pinpoint its location. The latest AirPods cases have built-in speakers that deliver louder tones, so it's even easier to locate them.

# AirTag can help you find just about anything.

Misplaced your keys? Forgot your purse? If they have an AirTag attached, they won't be lost for long. The Find My network can help you track down items on a map. You can play a sound on your AirTag to find something hiding nearby — you can even get the distance and direction to your AirTag with Precision Finding.
